Christophe De Ryck - Freelance Product Development

Christophe De Ryck is a young and dynamic Freelance Product Developer.

I have a proven track record in (New) Product Development and formed a speciality into mechanical development and towards the lighting industry.

My main focus lays on offering the following product development services:

1/ Ideation - product design - concept design

2/ System & concept development / Mechanical development

3/ CAD - engineering - detailed design

4/ Production start-up

5/ Sourcing (Europe/ Azia)

Key strengths

* Excellent knowledge of processing and finishing techniques of metal, aluminum, plastics and woods:
Ranging from machining (milling, turning,...), sheetmetal, (High Pressure/) Aluminum Diecasting, sandcasting, hot forging, hydroforming, vacuum molding, plastic injection molding, (vacuum/)blow-molding, rotomolding, compression molding, ... Up to date on new materials and production processes.

- * Excellent sketching, 3D visualisation & presentation skills
- * Fast prototyping (own workshop/ 3D printer) / functional prototyping (service)
- * CAD: Solidworks 2016 & Autodesk Inventor
- * Specialty: Lighting/ LED / LED-system optimization / LED-projects
- * Private office & Portable workstation

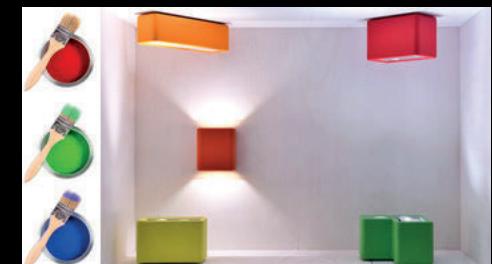

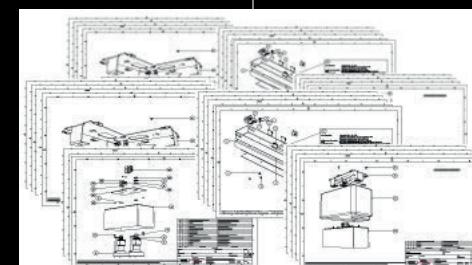

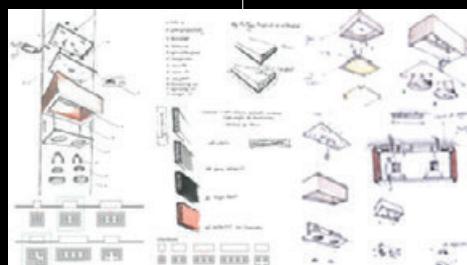

License held Software:

SOLIDWORKS 2016 professional / Photoview render 360 / Visualize (Bunkspeed)

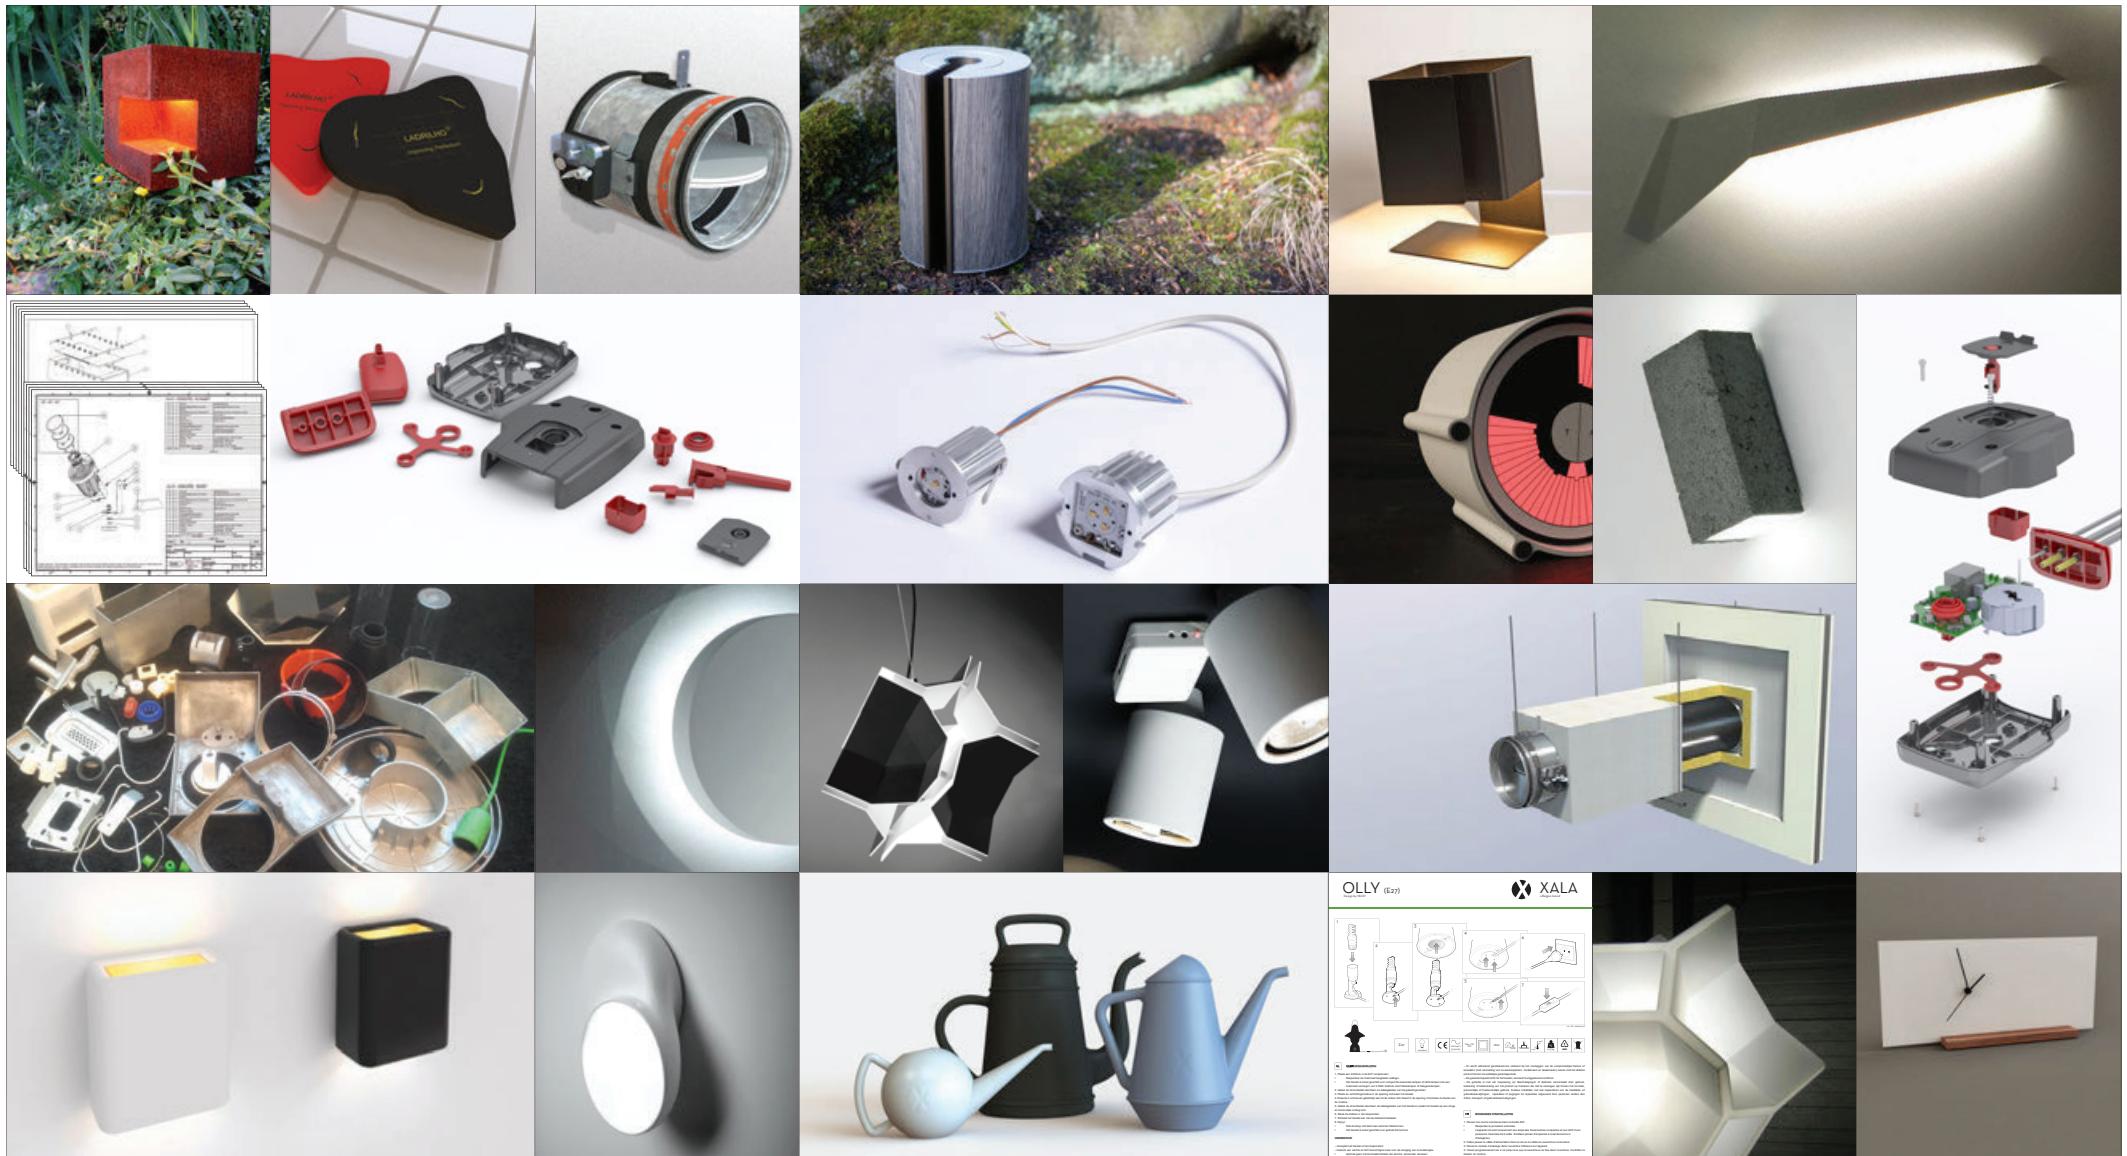

Autodesk inventor (+1mth-projects)

MS Office applications

Graphic design applications (Adobe creative suite: Photoshop/ Illustrator/ Indesign/ ...)
